What we do

Litigation & Enforcement

We're mindful that not all competition law issues can be addressed through compliance alone, and that our clients require effective litigation and enforcement strategies. We are perfectly positioned to provide holistic advice in complex competition litigation.

Counselling & Compliance

We provide tailored guidance to support informed decision-making, aid in understanding the impact of competition law, create effective compliance and training, and develop policies to minimise infringement risk.

Pro Bono

Financial constraints and information asymmetry often limit access to competition law enforcement. We dedicate a third of our time to addressing these limitations by representing clients with limited ability to pay and by contributing to academic thought and writing beyond client mandates.

Merger Control

We work closely with clients with competition law issues, from assessment to implementation. We help prepare merger filings, engage with regulators, and advise on how to avoid and mitigate risks, or structure litigation strategies.

Competition Policy & Advocacy

We develop evidence-based policy solutions by leveraging our diverse expertise in law, economics, and policymaking. Our contributions include regulatory consultations, research papers, studies, and policy recommendations.
